Bhagyashree Ghude

I am a 2022 Graduate. I aspire to learn and grow something new everyday and i am keen to employ my knowledge to enhance company profits as well as want to add value to your organization.

PROJECTS

Movie Recommendation System

A Machine Learning project that tries to predict your preferred items based on your or people similar to you.
⦿ User profiles for preferences and ratings ⦿ Content-based filtering for attribute-based suggestion

🔗 https://github.com/bhagyashreeghude/movie_recommendation_system-mvr-

Customer Segmentation

K-Means clustering techniques to dissect customer data, revealing intricate behavioral patterns.
⦿ Leveraged data-driven segmentation to optimize business strategies and deliver exceptional customer experiences.

🔗 <https://github.com/bhagyashreeghude/Customer-Segmentation>

Reminder system of drinking water

The "Water Reminder" script in Python sends timely desktop notifications.

⦿ Utilize the plyer library to send desktop notifications, prompting users to maintain hydration levels.
